

Golf Course News

Dear Members,

We are very pleased to report that our course is in its best condition ever for this time of the year and we plan to continue to improve both the appearance and playability of our beautiful course.

Our greens have reached a sustainable level of performance that we will maintain until our agronomic works begin in the spring. Our fairways are much improved this year due to the agronomic works that we have done and will continue to do in 2018.

We are continuing on with our bunker renovation works with #'s 16, 20, 21, 23, 25 and 27 scheduled to be reshaped and renovated this winter.

Most of our tee boxes have been much improved in 2017 with some notable exceptions. Tee boxes on #'s 1, 5, and 9 are scheduled for work in 2018 to include tree removal and trimming to add more air circulation and sunlight as well as rebuilding #9 tee box.

Our tree trimming and problem tree removal program will continue these winter as well as adding ornamental trees in select areas to improve our appearance. This program will allow us to improve both our appearance and our turf conditions. Our goal is simple.....to provide you the most playable and beautiful golf course in Southern China.

With Very Best Regards
