

Golf Course News

Dear Members,

We have entered our rainy season and all the drainage repair work we have done through the winter will now pay dividends. Our green coring schedule will begin in May and continue through the summer. This is a necessary process to remove thatch from our greens and to insure the best possible putting surfaces for the remainder of the year.

1st Coring

May 14-17	Middle Nine
May 28-31	Back Nine
June 04-07	Front Nine

2nd Coring

July 16-19	Middle Nine
July 23-26	Back Nine
July 30-Aug 2	Front Nine

Our bunker renovation works continue this spring with complete renovations on holes #10, 11, 18, 23, 26 and 27.

We have completed our tee box renovation on hole #9 and our new larger tee box will now be able to easily handle our traffic.

Thanks for all of your support

Harbour Plaza Grounds Maintenance Team.
