## Golf Course News

Dear Members,

Please join me in appreciation for our Grounds Maintenance Team for their great work this past summer and fall that has enabled our course to be in great condition this winter and this coming spring. With fantastic weather combined with a successful agronomic program, our course should continue to be good to very good until we start our programs again in the late spring. Thanks for your patience and support.

Additional golf course projects include our rebuilt #9 Blue Tee Box and the addition of a stair pathway. We have added stairs to this area due to it being a shade area as well as a high traffic area which make maintaining turf an impossible task.

On hole #14, we have cleared the area out to the right of the green between that green and #15 tee box and extended the landscaping from the left of the green, all the way behind and to the right of the green. This area will be not only much cleaner and easier to maintain, but will also allow you to both find and play your errant shots coming to rest there.

We will continue our winter tree trimming program. This program has opened up our course allowing much better air circulation and sunlight which has allowed our turf to improve.

Our drainage repairs will continue this winter as well. Please be patient with us in these areas. The work done now, will result in much better playing conditions this upcoming summer and fall.

Finally, please notice our renovated parking lot. We are most pleased to have thinned out some problem trees as well as replacing the shrubs with carpet grass. This will also be much easier to maintain and result in a cleaner landscape.

Thanks for all of your support

Harbour Plaza Grounds Maintenance Team.
