

Golf Course News

Dear Members,

We hope this finds you all safe and healthy during the last three months world-wide Coronavirus COVID 19 Outbreak.

Our maintenance team came through this period basically unaffected from a health standpoint for us and our families. Most of us stayed in Houjie for the holiday and those that travelled came back very early. During the time that the golf course was closed, we operated on a skeleton crew and performed basic maintenance work to keep the golf course manageable.

In light of this, we have had to delay or cancel many of our special projects that we had planned for in 2020 as well as moving the start date of our annual core aerifying program from May to June. We will still get in our two coring's with the final one in August insuring you a great call course for the fall and beyond.

We are very pleased to report that the many works that we performed during the winter have contributed to a course that looks very clean and tidy in spite of reduced staff levels during this period. We will continue to do this as we get back to normal and provide you with a golf course product in which we are all proud and among the best in Southern China.

With Best Regards

Harbour Plaza Golf Course Maintenance Team
