

Club Manager Message

Dear Members,

We are very happy to have opened the front nine again in April for your enjoyment. We have completed the rectification works on the front nine as well as renovating our bunkers, replacing the collars around each of the greens with TifGrand Bermuda and all of our cultural works including coring and topdressing the tees, fairways and greens.

As you can see, we have built drainage and u-channels around #2, 3, 4, 5 and 9 and collection areas on the lakes on #1, #2 and #5. We collect the surface runoff and then pump the water back into the city water supply for cleaning to insure that we are completely safe for our environment.

We are continuing to improve the landscaping on the front nine by replanting the ground cover areas around the u-channels and the collections areas and to create a new landscape around the collection ponds. Eventually all of this work will be hidden from view.

We have also started the rectification works on all of the water holes on the middle and back nines in a concerted effort to complete all of our works and have 27 holes open again as soon as possible. By doing this work, we have had to create a par 35 composite back nine that includes holes 10-13-14-15-16-20-21-22-25. We have also had to create alternative cart paths and add staff to help monitor traffic in these areas to reduce any potential risks to our golfers and to construction staff. We sincerely appreciate your patience and understanding during this timeframe for us.

We would also like to remind any members that have not picked up their 1000 RMB use coupons to please do so at the front desk, this coupon may be used on or before, December 31, 2016.

Finally we are very pleased to announce that Harbour Plaza Golf Club has become the first Green Grass Fitting Studio for professionally fitting Srixon and XXIO golf balls and clubs as well as Cleveland Golf. Please see Laura Lee for details and to set up your fitting appointment.
